

Delaware Alpha Delta Kappa
Report of the Technology and Newsletter Committee 2020 - 2022

The Technology and Newsletter Committee is responsible for the maintenance of the Delaware Alpha Delta Kappa website. (<https://adkdelaware.com/>) The committee is also available to create the state newsletter should the president need assistance, as well as support any other technological needs that may arise.

I had the honor of serving as the chairperson of this committee during the 2020-2022 biennium. I made sure that the domain name and the Wordpress subscription for the Delaware Alpha Delta Kappa website were kept current and paid for. I was reimbursed for those expenses. In maintaining the website, pages were created and updated to reflect the informational needs and the activities of the chapters and the sisters for the state of Delaware. For example, current biennium Executive Officers and Committee Chairpeople were updated, including contact information. Photos from various international, regional, state and chapter events were posted. Important upcoming dates were kept current. Links to important resources on the International website, such as the Bylaws and Policies and Procedures, were provided.

This committee was not required to produce newsletters for the co-presidents during this biennium, but is available to do so for the next biennium if needed.

It is recommended that this committee continue to keep track of the subscriptions and pay them according to their due dates, submitting these expenses which have been included in the budget. It is also recommended that this committee regularly update all website pages and calendars so that current information is available to the Delaware sisters. Chapter presidents and historians should be encouraged to share content to be posted, so that others can see what is going on throughout the state.

Respectfully submitted,
Pat McKeon

Delaware AΔK Technology and Newsletter Committee Chair 2020-2022
